

4-Month Data Analyst + AI Roadmap (2026–2027)

You only need to follow this one roadmap, and you will be ready to crack any data analyst interviews.

— @prernaa.py

MONTH 1 – BUILD STRONG FOUNDATIONS

Goal:

Build strong fundamentals in Data Analytics, Excel, SQL, and Business Thinking. These skills form the foundation for every Data Analyst interview.

=====

WEEK 1 – INTRODUCTION TO DATA ANALYTICS

Topics to Learn

- 1. What is Data Analytics?
 - Definition
 - Why companies use data
 - Real-world applications
 - Data-driven decision making
- 2. Types of Analytics
 - Descriptive Analytics
 - Diagnostic Analytics
 - Predictive Analytics
 - Prescriptive Analytics
- 3. Data Analytics Lifecycle
 - Business Problem
 - Data Collection
 - Data Cleaning
 - Data Analysis
 - Visualization
 - Insights
 - Business Recommendations
- 4. Understand Different Roles
 - Data Analyst

- Business Analyst
- Data Scientist
- Analytics Engineer
- BI Analyst

5. Business Domains

- E-commerce
- Banking
- Finance
- Retail
- Healthcare
- Marketing
- EdTech
- SaaS
- Supply Chain

6. Business Metrics

Sales Metrics

- Revenue
- Gross Sales
- Net Sales
- Average Order Value
- Profit
- Profit Margin

Marketing Metrics

- CAC
- ROI
- Conversion Rate
- CTR
- CPC
- CPM

Customer Metrics

- Churn Rate
- Retention Rate
- Customer Lifetime Value
- Net Promoter Score

HR Metrics

- Attrition Rate
- Employee Retention
- Hiring Time
- Cost Per Hire

Finance Metrics

- Gross Profit
- Net Profit
- Operating Margin
- EBITDA

Practice

- Read business case studies
- Learn how data solves business problems
- Watch dashboard walkthroughs
- Explain metrics in your own words

=====

WEEK 2 – MICROSOFT EXCEL

Excel Basics

- Workbook
- Worksheet
- Rows
- Columns
- Cells
- Formatting
- Cell Referencing
- Relative References
- Absolute References
- Mixed References

Data Cleaning

- Remove Duplicates
- Flash Fill
- Text to Columns
- Find & Replace
- Data Validation

- Sorting
- Filtering

Functions

Mathematical

- SUM
- SUMIF
- SUMIFS
- COUNT
- COUNTA
- COUNTIF
- COUNTIFS
- AVERAGE
- ROUND

Logical

- IF
- IFS
- IFERROR
- AND
- OR
- NOT

Lookup Functions

- VLOOKUP
- HLOOKUP
- XLOOKUP
- INDEX
- MATCH
- INDEX + MATCH

Text Functions

- LEFT
- RIGHT
- MID
- LEN
- TRIM
- SUBSTITUTE
- REPLACE
- CONCAT

- CONCATENATE
- TEXTJOIN
- TEXT

Date Functions

- TODAY
- NOW
- DATE
- YEAR
- MONTH
- DAY
- DATEDIF
- EOMONTH

Advanced Excel

- Pivot Tables
- Pivot Charts
- Conditional Formatting
- Slicers
- Timelines
- Named Ranges
- Power Query Basics
- What-if Analysis

Mini Projects

Project 1

Sales Dashboard

Project 2

HR Dashboard

Project 3

Financial Dashboard

Practice Goal

- 100 Excel Questions
- Clean 5 datasets
- Build 3 dashboards

=====

WEEK 3 & WEEK 4 – SQL (MOST IMPORTANT)

SQL Basics

- SELECT
- DISTINCT
- WHERE
- ORDER BY
- GROUP BY
- HAVING
- LIMIT
- ALIAS

Filtering

- LIKE
- IN
- BETWEEN
- IS NULL
- IS NOT NULL
- CASE WHEN

Aggregate Functions

- COUNT
- SUM
- AVG
- MIN
- MAX

Joins

- INNER JOIN
- LEFT JOIN
- RIGHT JOIN
- FULL JOIN
- SELF JOIN
- CROSS JOIN

String Functions

- CONCAT
- SUBSTRING
- LENGTH
- REPLACE
- TRIM
- LOWER
- UPPER

Date Functions

- CURRENT_DATE
- DATEADD
- DATEDIFF
- EXTRACT
- DATE_TRUNC

Intermediate SQL

- Subqueries
- Correlated Subqueries
- CTE (Common Table Expressions)
- Views
- Temporary Tables

Window Functions

- ROW_NUMBER()
- RANK()
- DENSE_RANK()
- LEAD()
- LAG()
- NTILE()
- FIRST_VALUE()
- LAST_VALUE()

Advanced SQL

- Recursive CTE

- Indexes
- Query Optimization
- Execution Plans
- Normalization
- Denormalization

SQL Practice Platforms

- LeetCode
- DataLemur
- HackerRank
- StrataScratch

Weekly Goal

- Solve 60 SQL Questions
- Learn all Joins
- Master GROUP BY
- Master Window Functions
- Build confidence writing queries without AI

END OF MONTH 1

Skills Achieved

- ✓ Business Understanding
- ✓ Excel
- ✓ SQL
- ✓ Business Metrics
- ✓ Dashboard Thinking

MONTH 2 – PYTHON + STATISTICS

Goal:
Learn Python for data analysis, master data manipulation using NumPy and Pandas, create visualizations, and build a solid understanding of statistics required for Data Analyst

interviews.

=====

WEEK 5 – PYTHON FUNDAMENTALS

Why Python?

- Most widely used programming language for Data Analytics
- Used for data cleaning, analysis, automation and machine learning
- Easy to learn and highly demanded

Install

- Python
- VS Code or PyCharm
- Jupyter Notebook
- Anaconda (Optional)

Topics to Learn

Python Basics

- Variables
- Data Types
- Type Casting
- Input & Output
- Comments

Operators

- Arithmetic Operators
- Comparison Operators
- Assignment Operators
- Logical Operators
- Membership Operators
- Identity Operators

Conditional Statements

- if

- elif
- else
- Nested if

Loops

- for Loop
- while Loop
- break
- continue
- pass

Functions

- User-defined Functions
- Arguments
- Return Statement
- Default Parameters
- Keyword Arguments
- Lambda Functions

Data Structures

Lists

- Indexing
- Slicing
- Append
- Insert
- Remove
- Pop
- Sort
- Reverse

Tuples

Sets

Dictionaries

String Operations

- Slicing
- Formatting
- Split
- Join
- Replace
- Strip
- Find
- Count

Exception Handling

- try
- except
- finally
- raise

File Handling

- Read Files
- Write Files
- CSV Files

Object-Oriented Programming

- Class
- Object
- Constructor
- Inheritance
- Encapsulation

Modules

- import
- from...import
- Creating Modules

Practice Goal

- Solve 80–100 Python Problems
- Build Small Console Programs
- Strengthen Logic Building

WEEK 6 – NUMPY + PANDAS

NUMPY

Topics

- Arrays
- Creating Arrays
- Indexing
- Slicing
- Reshaping
- Broadcasting
- Vectorization
- Mathematical Operations
- Random Module

Practice

- Perform Calculations
 - Matrix Operations
 - Data Manipulation
-

PANDAS

Reading Data

- CSV
- Excel
- JSON

Exploring Data

- head()
- tail()
- info()
- describe()

- shape
- columns

Selecting Data

- loc[]
- iloc[]

Filtering Data

- Boolean Indexing
- Multiple Conditions

Cleaning Data

- Missing Values
- Fill Missing Values
- Drop Missing Values
- Remove Duplicates
- Rename Columns
- Change Data Types

Combining Data

- concat()
- merge()
- join()

Aggregation

- groupby()
- pivot_table()

Sorting

- sort_values()

Transformation

- apply()
- map()

- `replace()`

Export

- CSV
- Excel

Practice Goal

- Analyze 10 Real Datasets
- Perform Complete Data Cleaning
- Write Reusable Pandas Code

=====

WEEK 7 – DATA VISUALIZATION

MATPLOTLIB

Charts

- Line Chart
- Bar Chart
- Horizontal Bar Chart
- Scatter Plot
- Histogram
- Pie Chart
- Area Chart

Customization

- Labels
- Titles
- Legends
- Grid
- Figure Size

SEABORN

Charts

- Heatmap
- Pairplot
- Countplot
- Boxplot
- Violin Plot
- Distribution Plot
- Regression Plot
- Catplot

Visualization Skills

- Choosing the Right Chart
- Dashboard Storytelling
- Identifying Trends
- Detecting Outliers
- Explaining Business Insights

Mini Projects

- Sales Trend Analysis
- Customer Segmentation
- Product Performance Analysis

Practice Goal

- Create 30+ Charts
- Explain Every Visualization Like a Business Analyst

=====

WEEK 8 – STATISTICS FOR DATA ANALYSTS

Descriptive Statistics

- Mean
- Median
- Mode
- Range
- Variance

- Standard Deviation

Percentiles

- Quartiles
- Percentiles
- Interquartile Range (IQR)

Probability

- Basic Probability
- Conditional Probability
- Independent Events

Distributions

- Normal Distribution
- Binomial Distribution
- Uniform Distribution

Sampling

- Population
- Sample
- Sampling Techniques

Central Limit Theorem

- Concept
- Importance
- Real-world Applications

Hypothesis Testing

- Null Hypothesis
- Alternative Hypothesis
- p-value
- Significance Level

Statistical Tests

- Z-Test
- T-Test
- Chi-Square Test
- ANOVA (Basics)

Relationships

- Correlation
- Covariance
- Correlation vs Causation

Business Statistics

- A/B Testing
- Confidence Interval
- Outlier Detection
- Skewness
- Kurtosis

Practice

- Solve Numerical Questions
- Interpret Statistical Results
- Understand Interview-Based Scenarios

=====

Mini Projects

Project 1

Customer Sales Analysis using Pandas

Project 2

Netflix Dataset Analysis

Project 3

Retail Sales Data Cleaning

Project 4

COVID-19 Data Analysis

Project 5

IPL Data Analysis

MONTH 2 CHECKLIST

- ✓ Python Basics
- ✓ NumPy
- ✓ Pandas
- ✓ Data Cleaning
- ✓ Exploratory Data Analysis (EDA)
- ✓ Data Visualization
- ✓ Statistics
- ✓ Business Interpretation

MONTH 2 PRACTICE TARGET

- 80–100 Python Coding Questions
- Analyze 10 Real-World Datasets
- Create 30+ Charts
- Complete 5 Mini Projects
- Revise Statistics Every Weekend
- Push All Projects to GitHub

MONTH 3 – POWER BI + AI + PORTFOLIO PROJECTS

Goal:

Learn Power BI for dashboard creation, master AI tools that modern Data Analysts use daily, and build industry-level portfolio projects that impress recruiters.

=====

WEEK 9 – POWER BI

Why Power BI?

- Most demanded BI tool in Data Analyst jobs
- Used for creating interactive dashboards
- Connects multiple data sources
- Helps businesses make data-driven decisions

Installation

- Power BI Desktop
- Microsoft Power BI Service (Basics)

Power BI Fundamentals

- Interface Overview
- Import Data
- Connect to Excel
- Connect to CSV
- Connect to SQL Database
- Data Refresh

Power Query

- Clean Data
- Remove Duplicates
- Replace Values
- Merge Columns
- Split Columns
- Change Data Types
- Append Queries
- Merge Queries

Data Modeling

- Relationships
- Cardinality
- Star Schema
- Snowflake Schema
- Fact Tables
- Dimension Tables

DAX (Data Analysis Expressions)

Learn

- SUM
- SUMX
- COUNT
- DISTINCTCOUNT
- AVERAGE
- CALCULATE
- FILTER
- ALL
- RELATED
- IF
- SWITCH

Create

- Calculated Columns
- Measures

Visualizations

- Cards
- KPI Cards
- Tables
- Matrix
- Bar Charts
- Column Charts
- Line Charts
- Pie Charts
- Maps

- Treemaps
- Scatter Charts
- Gauge Charts
- Waterfall Charts

Interactive Features

- Slicers
- Drill Down
- Drill Through
- Tooltips
- Bookmarks
- Buttons
- Navigation

Publishing

- Publish Dashboard
- Share Reports
- Workspace Basics

Practice Goal

- Build 5 Interactive Dashboards

=====

WEEK 10 – DASHBOARD PROJECTS

Project 1

Sales Dashboard

KPIs

- Revenue
- Profit
- Quantity Sold
- Sales Growth
- Top Products
- Top Regions

Project 2

HR Analytics Dashboard

KPIs

- Attrition Rate
- Employee Count
- Average Salary
- Department Analysis
- Gender Distribution
- Employee Satisfaction

Project 3

Finance Dashboard

KPIs

- Revenue
- Expenses
- Profit Margin
- Monthly Trends
- Budget vs Actual

Project 4

Marketing Dashboard

KPIs

- Campaign Performance
- ROI
- Conversion Rate

- Customer Acquisition Cost
- CTR

Project 5

Healthcare Dashboard

KPIs

- Patient Count
- Admission Trends
- Disease Analysis
- Recovery Rate

Practice Goal

- Create dashboards that tell a business story.
- Focus on insights, not just visuals.

WEEK 11 – AI FOR DATA ANALYSTS (MOST IMPORTANT FOR 2026–2027)

Understand AI Concepts

- Artificial Intelligence (AI)
- Machine Learning (ML)
- Deep Learning
- Generative AI
- Large Language Models (LLMs)
- AI Agents (Basics)
- Retrieval-Augmented Generation (RAG) – Basics

Prompt Engineering

Learn

- Role Prompting
- Few-Shot Prompting

- Chain Prompting
- Prompt Refinement
- Structured Prompting

How to Write Better Prompts

Example Structure

Role

Task

Context

Constraints

Expected Output

=====

AI TOOLS EVERY DATA ANALYST SHOULD KNOW

1. ChatGPT

Use For

- Writing SQL Queries
- Optimizing SQL
- Explaining SQL
- Debugging SQL
- Writing Python Code
- Debugging Python
- Pandas Operations
- Excel Formulas
- Power BI DAX
- Dashboard Ideas
- Data Cleaning
- Resume Building
- Interview Preparation
- Mock Interviews
- Documentation
- Business Insights

2. Claude

Use For

- Reading Long PDFs
 - Business Reports
 - Requirement Documents
 - Report Writing
 - Summarizing Research
-

3. Gemini

Use For

- Google Sheets
 - Google Docs
 - Formula Generation
 - Research
 - Workspace Integration
-

4. Microsoft Copilot

Use For

- Excel Automation
 - Power BI Assistance
 - Microsoft Word
 - PowerPoint
 - Outlook
-

5. Perplexity AI

Use For

- Industry Research

- Market Trends
- Competitor Analysis
- Fact Checking

6. NotebookLM

Use For

- Learn from PDFs
- Summarize Books
- Organize Notes
- Study Faster

7. GitHub Copilot

Use For

- Python Coding
- SQL Coding
- Automation Scripts
- Debugging

AI + EXCEL

Learn How AI Can

- Generate Formulas
 - Explain Formulas
 - Clean Data
 - Create Pivot Tables
 - Build Dashboards
 - Analyze Sales Data
-

AI + SQL

Learn How AI Can

- Generate Queries
- Explain Queries
- Optimize Queries
- Create Window Functions
- Build CTEs
- Debug Errors

=====

AI + PYTHON

Learn How AI Can

- Write Pandas Code
- Clean Data
- Perform EDA
- Build Charts
- Automate Reports
- Debug Code

=====

AI + POWER BI

Learn How AI Can

- Write DAX
- Suggest KPIs
- Improve Dashboard Design
- Generate Business Insights
- Explain Visualizations

=====

AI LIMITATIONS

Understand

- Hallucinations
- Data Privacy
- Prompt Validation
- Human Verification
- Responsible AI Usage

=====

WEEK 12 – PORTFOLIO PROJECTS

Goal

Build 5–7 End-to-End Projects

Project 1

Sales Analytics Dashboard

Skills

- Excel
- SQL
- Python
- Power BI

Project 2

Customer Churn Analysis

Skills

- SQL
- Python
- Statistics
- Power BI

Project 3

HR Analytics Dashboard

Skills

- Excel
 - Power BI
 - DAX
-

Project 4

Blinkit Sales Analysis

Skills

- SQL
 - Python
 - Dashboarding
-

Project 5

Netflix Data Analysis

Skills

- Python
 - Pandas
 - Visualization
-

Project 6

Supply Chain Analytics

Skills

- SQL
- Power BI
- Business KPIs

Project 7

Financial Performance Dashboard

Skills

- Excel
- SQL
- Power BI

=====

FOR EVERY PROJECT INCLUDE

- Business Problem
- Dataset Description
- Data Cleaning
- Exploratory Data Analysis (EDA)
- SQL Queries
- Python Analysis
- Power BI Dashboard
- Key Insights
- Business Recommendations
- Challenges Faced
- Future Improvements
- GitHub Repository
- README File
- Dashboard Screenshots

=====

MONTH 3 CHECKLIST

- ✓ Power BI

- ✓ Power Query
- ✓ DAX
- ✓ Data Modeling
- ✓ AI Tools
- ✓ Prompt Engineering
- ✓ Dashboard Design
- ✓ Portfolio Projects
- ✓ GitHub Portfolio

=====

MONTH 3 PRACTICE TARGET

- Build 5 Power BI Dashboards
- Complete 5–7 Portfolio Projects
- Learn 7 AI Tools
- Practice AI Prompt Engineering Daily
- Publish Every Project on GitHub
- Write Project Documentation
- Share Your Projects on LinkedIn

MONTH 4 – INTERVIEW PREPARATION + RESUME + JOB SEARCH

Goal:
Become interview-ready by polishing your resume, strengthening your portfolio, mastering interview questions, and preparing for real-world business case studies.

WEEK 13 – RESUME, LINKEDIN & GITHUB

RESUME

Resume Structure

- Name & Contact Information
- Professional Summary
- Technical Skills
- Projects
- Internship/Experience
- Certifications
- Education
- GitHub
- LinkedIn

Resume Tips

- Keep it to one page
- Use ATS-friendly format
- Quantify achievements
- Mention tools used in every project
- Use action verbs
- Avoid unnecessary graphics
- Proofread carefully

Professional Summary Example

"Data Analyst skilled in SQL, Excel, Python, Power BI, Statistics, and AI tools. Experienced in data cleaning, exploratory data analysis, dashboard creation, and solving business problems through data-driven insights."

LINKEDIN

Optimize Your Profile

- Professional Photo
- Custom Banner
- Strong Headline
- Detailed About Section
- Featured Projects
- Certifications
- Skills
- Recommendations
- Open to Work

Content Ideas

- Share project walkthroughs
- Post SQL tips
- Share Python tricks
- Explain business metrics
- Create dashboard breakdowns
- Share interview experiences
- Write about AI tools
- Review datasets

Goal

- Post at least 2–3 times every week.

GITHUB

Repository Checklist

- Clean folder structure
- Well-written README
- Dataset link
- SQL queries
- Python notebooks
- Power BI dashboard
- Dashboard screenshots
- Business insights
- Project conclusion

README Should Include

- Project Overview
- Business Problem
- Dataset
- Tools Used
- Process
- Key Insights
- Recommendations
- Future Scope

=====

WEEK 14 – BUSINESS CASE STUDIES

Practice Domain-wise Case Studies

E-commerce

Questions

- Why are sales declining?
- Which products are underperforming?
- Which customers generate maximum revenue?
- What is the best-selling category?

Banking

Questions

- Why are customers leaving?
- Which branch performs best?
- Which loan category has the highest default rate?

Healthcare

Questions

- Which disease is increasing?
- Which department has the highest admissions?
- How can patient wait time be reduced?

Retail

Questions

- Which stores generate maximum profit?
- Which products should be discontinued?
- Which season generates maximum sales?

Marketing

Questions

- Which campaign has the highest ROI?
- Why has conversion dropped?
- Which channel performs best?

HR

Questions

- Why is employee attrition increasing?
- Which department has the highest turnover?
- How can retention improve?

=====

WEEK 15 – INTERVIEW PREPARATION

SQL Interview Topics

Basics

- SELECT
- WHERE
- GROUP BY
- HAVING
- ORDER BY

Intermediate

- Joins
- Subqueries
- CTE
- CASE WHEN
- Aggregate Functions

Advanced

- Window Functions
- Recursive CTE
- Query Optimization
- Indexes
- Views

Target

- Solve 20–30 SQL questions daily.
- Reach 250–300 questions overall.

PYTHON INTERVIEW

Topics

- Lists
- Dictionaries
- Functions
- File Handling
- Pandas
- NumPy

- Data Cleaning
- EDA

Practice

- Coding questions
 - Data manipulation
 - CSV processing
-

EXCEL INTERVIEW

Topics

- VLOOKUP
 - XLOOKUP
 - INDEX MATCH
 - Pivot Tables
 - Conditional Formatting
 - Power Query
 - IF Functions
 - SUMIFS
 - COUNTIFS
-

POWER BI INTERVIEW

Topics

- DAX
 - Measures
 - Calculated Columns
 - Relationships
 - Star Schema
 - Power Query
 - Dashboard Design
 - Publishing
-

STATISTICS INTERVIEW

Topics

- Mean
- Median
- Mode
- Standard Deviation
- Variance
- Probability
- Confidence Interval
- Hypothesis Testing
- Correlation
- A/B Testing

AI INTERVIEW

Topics

- How do you use ChatGPT in analytics?
- Prompt Engineering
- AI limitations
- Data privacy
- AI-assisted SQL
- AI-assisted Python
- AI-assisted dashboard creation

=====

BEHAVIORAL QUESTIONS

Prepare Answers For

- Tell me about yourself.
- Why Data Analytics?
- Why should we hire you?
- Explain one project end-to-end.
- What challenges did you face?

- Tell me about a failure.
- Tell me about a successful project.
- Describe a time you worked in a team.
- How do you handle deadlines?
- What are your strengths?
- What are your weaknesses?
- Where do you see yourself in 5 years?

Use the STAR Method

S – Situation

T – Task

A – Action

R – Result

=====

WEEK 16 – MOCK INTERVIEWS & FINAL REVISION

Mock Interviews

Conduct at least 10 mock interviews.

Practice

- SQL Round
- Python Round
- Excel Round
- Power BI Round
- Statistics Round
- HR Round
- Project Discussion
- Business Case Study

Revision Checklist

- ✓ SQL
- ✓ Excel

- ✓ Python
- ✓ Power BI
- ✓ Statistics
- ✓ AI Tools
- ✓ Projects
- ✓ Resume
- ✓ LinkedIn
- ✓ GitHub

=====

DAILY STUDY PLAN (5–6 HOURS)

30 Minutes

- Revise Previous Topics

45 Minutes

- Excel

90 Minutes

- SQL Practice

60 Minutes

- Python

45 Minutes

- Statistics

45 Minutes

- Power BI / Dashboard Building
-

30 Minutes

- AI Tools & Prompt Engineering
-

45 Minutes

- Project Building
-

30 Minutes

- Interview Questions / Mock Interview
- =====

WEEKLY GOALS

- Solve 50–70 SQL Questions
 - Solve 10–15 Python Problems
 - Build 1 Dashboard
 - Complete 1 Mini Project
 - Publish 1 LinkedIn Post
 - Push Code to GitHub 3 Times
 - Revise Statistics
 - Practice 1 Mock Interview
- =====

TOP TOOLS TO MASTER

Data Analysis

- Microsoft Excel
- SQL (MySQL/PostgreSQL)
- Python
- NumPy
- Pandas
- Matplotlib
- Seaborn
- Power BI

Version Control

- Git
- GitHub

AI Tools

- ChatGPT
- Claude
- Gemini
- Microsoft Copilot
- Perplexity AI
- NotebookLM
- GitHub Copilot

Learning Platforms

- Kaggle
- LeetCode
- DataLemur
- StrataScratch
- HackerRank

=====

RECOMMENDED CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Microsoft Power BI Data Analyst (PL-300)

- Microsoft Azure Data Fundamentals (DP-900)
- AWS Certified Cloud Practitioner
- IBM Data Analyst Professional Certificate

=====

FINAL INTERVIEW CHECKLIST

Technical Skills

- ✓ Advanced Excel
- ✓ SQL
- ✓ Python
- ✓ Statistics
- ✓ Power BI
- ✓ Data Cleaning
- ✓ Exploratory Data Analysis
- ✓ Dashboard Building
- ✓ Business Case Studies
- ✓ AI for Data Analytics

Portfolio

- ✓ 5–7 End-to-End Projects
- ✓ GitHub Portfolio
- ✓ Professional README Files

✓ Dashboard Screenshots

Professional Branding

✓ ATS-Friendly Resume

✓ Optimized LinkedIn Profile

✓ Active GitHub

Interview Readiness

✓ 250–300 SQL Questions Solved

✓ 100+ Python Problems Solved

✓ 10+ Mock Interviews

✓ Strong Project Explanations

✓ STAR-Based Behavioral Answers

=====

FINAL OUTCOME AFTER 4 MONTHS

By following this roadmap consistently, you will have:

✓ Advanced Excel skills for business analysis.

✓ Strong SQL proficiency, including joins, subqueries, CTEs, window functions, and query optimization.

✓ Python skills for data cleaning, analysis, visualization, and automation.

✓ Solid understanding of statistics and business metrics.

✓ Power BI expertise with DAX, Power Query, and interactive dashboards.

✓ Practical experience using AI tools such as ChatGPT, Claude, Gemini, Microsoft Copilot, Perplexity AI, NotebookLM, and GitHub Copilot to improve productivity.

- ✓ A portfolio of 5–7 industry-level projects demonstrating end-to-end analytics workflows.
- ✓ A professional GitHub profile showcasing code, dashboards, and documentation.
- ✓ An ATS-friendly resume and optimized LinkedIn profile.
- ✓ Confidence in solving real business problems and explaining insights.
- ✓ Complete preparation to crack Data Analyst interviews in 2026–2027.
