

Power BI Dashboard Presentation

Instructions & Evaluation Guidelines

Objective:

To assess students on their ability to create, analyze, and present interactive dashboards using **Microsoft Power BI**, demonstrating both technical proficiency and presentation skills.

Total Marks: 100

The assessment will be divided into the following three components:

Component	Marks	Description
1. Dashboard Preparation	25 Marks	Students are required to design a functional and visually appealing dashboard in Power BI using the provided dataset. Evaluation will be based on design clarity, use of visuals, interactivity, and overall structure.
2. Knowledge of the Dataset	25 Marks	Students must demonstrate understanding of the dataset used—its source, data cleaning process, and key insights derived. They should be able to explain data relationships, measures, and DAX formulas (if applied).
3. Presentation Skills	50 Marks	Each student will present their dashboard to the panel/instructor. Evaluation will focus on communication clarity, confidence, logical flow, explanation of insights, and ability to answer questions related to the dashboard.

Submission Guidelines:

1. The Power BI dashboard file (.pbix) must be submitted before the presentation date.
2. Students should ensure that all visuals and data connections are working properly.
3. Presentation duration: **5–7 minutes per student.**
4. Any plagiarism or use of pre-built dashboards will result in disqualification.
